PROFESSIONAL SUMMARY

Aspiring Software Engineer with strong knowledge in Java, Object Oriented Programming (OOP), Spring Boot, REST API development and SQL based database design (MySQL). Also explored Generative AI concepts including LLM, RAG and AI agents to extend backend applications with AI powered features. Also developed AI powered projects using Gemini API.

PROJECTS

TeacherRegistry | Java, Spring Boot, MySQL, REST API, JPA, Hibernate.

Developed a RESTful backend using Spring Boot with full CRUD operations for teacher management, exposing 15+ API endpoints.

Implemented Spring Data JPA with custom JPQL queries for dynamic filtering by age, experience, salary, gender, position and department.

Designed layered architecture (Controller → Service → Repository) with clean separation of concerns following industry best practices.

Built custom exception handling using `@RestControllerAdvice` and `RuntimeException` to return meaningful error responses.

Technologies used : Java, Spring Boot, MySQL, REST API, JPA, Hibernate.

AI-Powered Resume Builder | Java, Spring Boot, JPA, MySQL, Gemini API.

Developed a secure backend application using Spring Boot, enabling users to create and manage resumes through REST APIs.

Integrated an AI service (Google Gemini API) to automatically generate resume content from user-provided text.

Designed database models and connected them to MySQL for storing user accounts and resume data.

Technologies used : Java, Spring Boot, JPA, MySQL, Gemini API.

ACHIEVEMENTS

- PGDAC Certified By CDAC
- Java Certified By HackerRank

TECHNICAL SKILLS

Programming Language:

Java

Core Fundamentals

OOP Concepts

Frameworks / Libraries:

Spring

Spring Boot

Spring MVC

Microservices

Database Technologies /

Connectivity:

Hibernate

MySQL

Build & Dependency Management:

Maven

Version Control:

Git

GitHub

AI Concepts:

Machine Learning (ML)

Deep Learning (DL)

Generative AI

Agentic AI

Large Language Models (LLMs)

Fine-Tuning

MCP (Model Context Protocol)

Retrieval-Augmented Generation

Tokenization

Context Window

Inference

Transformer

Vector Database

AI-Powered Multilingual Dictionary | Java, Spring Boot, JPA, H2, Gemini API.

Developed a secure backend application using Spring Boot, enabling users to search words and get AI-generated meanings, translations and examples through REST APIs.

Integrated an AI service (Google Gemini API) to automatically generate word meanings, synonyms and examples in multiple languages.

Technologies used: Java, Spring Boot, JPA, H2, Gemini API.

EDUCATION

Bachelor of Engineering (BE):
Sandip Institute of Technology and Research Centre, Nashik.
Savitribai Phule Pune University.

PGDAC, Development of Advanced Computing:
Centre for Development of Advanced Computing (C-DAC),
Noida.

AI Benchmarks
Temperature
Guardrails
OpenRouter
Hugging Face
Ollama

AI Models:
GPT-5.5
Claude Sonnet 4.6 / Opus 4.8
Gemini 3.5 Flash / 3.1 Pro

Agentic AI Tools / Frameworks:
OpenCode
Antigravity
LangChain
LangGraph

SKILLS

Self and quick learner
Self-motivated
Positive attitude
