ACHIEVEMENTS

- PGDAC Certified By CDAC

- Java Certified By HackerRank

EXPERIENCE

Zensar Technologies, Pune — Software Engineer

Oct 2023 - PRESENT (2+ Years)

Zensar Technologies builds innovative Data and AI-driven software that enhances operational efficiency and productivity by developing next-generation technology platforms.

ROLES & RESPONSIBILITIES

Built and maintained RESTful backend APIs using Java, Spring Boot and Hibernate, ensuring scalable and high-performing application services.

Collaborated with front-end developers and cross-functional teams to deliver integrated, end-to-end business solutions.

Designed, implemented and optimised SQL queries and database schemas in MySQL, ensuring efficient data storage, retrieval and application performance.

TECHNICAL SKILLS

Programming Languages:

Core Java

Frameworks / Libraries:

Spring

Spring Boot

Spring MVC

Spring Security

Microservices

Database Technologies / Connectivity:

Hibernate

JDBC

MySQL

Build & Dependency Management:

Maven

Version Control:

Git

GitHub

PROJECT

Academic Inventory

Management System (AIMS):

Developed a Microservices-based inventory and procurement system for Barnes & Noble Education using Java/Spring Boot. Streamlined book adoption for 200+ universities, enabling on-time delivery/pickup.

Designed and developed REST APIs for professor selections, student cart management, and order processing, significantly improving book availability.

EDUCATION

Bachelor of Engineering (BE):

Sandip Institute of Technology and Research Centre (Pune University)

June 2015 – May 2020

PGDAC, Development of Advanced Computing:

Centre for Development of Advanced Computing (C-DAC)

Sep 2022 – Mar 2023

SKILLS

Self and quick learner

Self-motivated

Positive attitude
